PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience in designing, developing, and maintaining cross-platform mobile applications. Proficient in Flutter, Dart, Clean Architecture, Bloc/Cubit, Firebase, and API integration. Experienced in building responsive and user-friendly applications with a focus on code quality, performance, and scalability. Dedicated to learning new technologies and delivering high-quality mobile solutions.

TECHNICAL SKILLS

Mobile Development	Flutter, Dart (Android & iOS)
State Management	Bloc, Cubit, Provider
Architecture	Clean Architecture, MVVM
APIs & Backend	RESTful APIs, Dio, HTTP, Firebase (Auth, Firestore, FCM)
Local Storage	Hive, Shared Preferences, Flutter Secure Storage
Tools & Platforms	Git, GitHub, Postman, AI-assisted development tools
Soft Skills	Problem-solving, Agile collaboration, Code review

EXPERIENCE

Flutter Developer

Freelance | 2024 – Present

- Designed, built, and shipped 2 production-ready Flutter applications (Walletix and H&S Brand), covering the full development lifecycle from architecture to deployment.
- Applied Clean Architecture and Bloc/Cubit state management to decouple business logic from UI, increasing feature scalability and reducing code coupling across multiple modules.
- Integrated RESTful APIs using Dio and Firebase services (Authentication, Firestore, FCM) to enable dynamic, real-time functionality.
- Implemented offline-first storage with Hive, enabling efficient local transaction management for hundreds of records with no network dependency.
- Built reusable UI components and widget libraries, reducing development time on new features and ensuring consistent design across screens.

PROJECTS

Walletix – Personal Finance Manager (Github)

A cross-platform personal finance application enabling users to track expenses, manage budgets, schedule payment reminders, and analyze spending habits. Features offline-first storage via Hive, multi-language support through Flutter Localization, and push notifications for budget alerts.

Technologies: Flutter, Dart, Bloc, Hive, Local Notifications, Localization, Clean Architecture

Tomato Quality Detector – AI-Powered Mobile App (Github)

An AI-powered mobile application that detects tomato freshness and predicts shelf life using trained machine learning models. Integrated a computer vision model for real-time image classification (fresh vs. spoiled) to support agricultural decision-making.

Technologies: Flutter, Dart, Firebase, Machine Learning

Hungry App – Burger Ordering App (Github)

Built a burger ordering mobile application using Flutter. Features include menu browsing, burger details, cart management, and an intuitive user interface. Focused on responsive design, smooth navigation, and delivering a seamless user experience.

Technologies: Flutter, Dart, REST APIs, Cubit

H&S Brand – Business Showcase App (Github)

A modern business mobile application designed to showcase products and services with a clean, responsive UI. Focused on optimized API integration and smooth user experience, resulting in improved application performance and higher user engagement.

Technologies: Flutter, Dart

EDUCATION

Bachelor of Science – Computer Science & Information Systems
Culture and Science City University | 2021 – 2025

LANGUAGES

Arabic – Native | English – Professional Working Proficiency
